

# elite Green lockers

elite lockers have officially gone green on a selected range of lockers that contain **Abbeysteel™** sustainably sourced steel.

## elite Green lockers

- Lockers contain from between 11-44% off-cut steel... automotive industry by-product
- Demonstrate enhanced green credentials to end users
- Unique selling point
- UK manufactured products
- Anti-bacterial powder coating

In reflecting the needs of businesses that demand a low carbon economy by improving the environmental credentials of products that are used every day... Elite can announce that all of their single-to-eight door lockers and five-to-fifteen door garment dispensers now contain Abbeysteel™ Sustainably Sourced Steel, a unique raw material that can show a significantly reduced carbon footprint of the products that contain it and the businesses that use it.

Abbeysteel™ is the world's first green brand of sustainably sourced steel that has been created to showcase a prime steel by-product that is sourced from a range of UK multi-industry applications. Abbeysteel™ combines the uniqueness of a trademarked raw material and that of a sustainable material resource for businesses that would like to show a reduced impact on the environment by reusing materials.
